Office Action Summary	Application No. 10/694,341	Applicant(s) KATOU ET AL	
	Examiner Jermaine Jenkins	Art Unit 2855	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claim 14 is rejected under 35 U.S.C. 102(e) as being anticipated by Normann et al (6,633,229).

In regards to claim 14, Normann et al teaches a tire monitoring system having a semiconductor sensor including a pressure sensing portion for detecting air pressure of the tire and an acceleration sensing portion for detecting acceleration, the pressure sensing portion and the acceleration sensing portion being formed integrally with each other (Column 2, lines 16-32); and a controller connected to the semiconductor sensor for determining whether or not the vehicle is moving from the detected acceleration, wherein the controller transmits information of the detected tire air pressure when the vehicle is moving (Column 5, lines 27-46).

Allowable Subject Matter

3. Claims 1-13 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose or suggest a semiconductor sensor having a third

Art Unit: 2855

electrode arranged in the cavity facing towards the first electrode, wherein the third electrode and the first electrode are arranged in the hermetic chamber; and a second plate bonded to the second surface and having a mass, the second plate including an elastic support for elastically supporting the mass and a fourth electrode arranged on the mass facing towards the second electrode.

5. Claims 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- U.S. Patent 5,531,092 (Okada) – Device for Moving a Suspended Weight Body
- U.S. Patent 5,320,705 (Fujii et al) – Method of Manufacturing a Semiconductor Pressure Sensor
- U.S. Patent 5,095,349 (Fujii et al) – Semiconductor Pressure Sensor and Method of Manufacturing Same
- Japanese Patent 10-132572A (Shiratori et al) – Electrostatically Driven Angular Velocity Sensor
